Results of Blood Screening in 2013

- Began direct instrumental screening in 2012;
- 2012 was an educational year;
- Established thresholds prior to the 2013 race meet on commonly used therapeutics to avoid positives at a level that would have no effect on the horse at race time

Outstanding 2009 thru 2012 Staff Recommendations

- Adoption of model medication & penalty rules – (*Research being conducted*);
- Explore rulemaking for out-of-competition testing (*Should the WHRC have authority at off-site facilities*);
- Require continuing education & testing of owners, trainers, & grooms – (*No Formal Action, HBPA offering voluntary CE*);
- Rulemaking regarding claimed horses breaking down during racing & impact to the original owner (*No Action*);
- Participate in industry task force to explore causes & methods to prevent catastrophic breakdowns of racehorses;
- Remind trainers about the need to keep a good history on horses' winter activities (or non-activity), especially three year olds – to help prevent humerus fractures; and ;
- Adopt Model Rules for Equine Medications, including lowering the threshold for phenylbutazone to two (2) micrograms per milliliter. - (*No Action*)

2013 Staff Recommendations

- *Continue to move toward ARCI and RMTC model rules regarding therapeutic medications*
